The organizer has the right to stop unloading and loading activities at any time, in particular in the event of unfavourable weather conditions. After the work is resumed, the sequence established before its termination is followed.

7. Applications for unloading and loading activities will be accepted only until dusk. In the period between dusk and the hours specified in point 6, only the work already started will be completed.

8. Subject to point 9 the commencement of unloading and loading works after dusk and outside the hours specified in point 6 is possible only in exceptional situations after obtaining the consent of the Forwarding Manager, who notes this fact in the Confirmation of Forwarding Services. In order to obtain the consent, it is required to present the

technical data of the exhibits, knowledge of their attachment points and weight distribution (including the appropriate slings or other auxiliary elements, if required), as well as the equipment operator's vision of the stand. Unloading and loading works commenced after dusk and outside the hours specified in point 6 take place at the Exhibitor's sole risk and in the event of any damage, the Exhibitor is not entitled to any claims against the operators of the equipment and the Organizer.

9. The loading and unloading works with the use of the ramp may only take place during the hours specified in point 6 without the possibility of deviation from this principle.

10. Unloading and loading operations will be performed on the basis of the order of notifications received by the Forwarding Office on a given day. It is not possible to reserve the equipment for the next day or any other day.

11. The order of performing unloading and loading activities (order fulfillment) is determined by the Freight Forwarding Manager. The dates and times specified in the applications are for information purposes only and to help estimate Exhibitors' needs for a given day and are not the basis for equipment booking or other claims.

12. Each time after the completion of a single forwarding operation (unloading, loading, etc.), the equipment is at the discretion of the Freight Forwarding Office and it is not possible to stop it in order to continue forwarding operations at a later time.

13. If the downtime between operations exceeds 15 minutes, but the Exhibitor still wants to keep the equipment at his own disposal, it is possible only after obtaining the consent of the Freight Forwarding Manager and verification of the time remaining for the Exhibitor to use for forwarding services.

14. The rules set out in point 13 also apply when the equipment provided during the assembly of the exhibit waits more than 15 minutes for the delivery of subsequent parts for assembly (e.g. located on another car that is still on its way to the Exhibition area).

15. Any arrangements between Exhibitors and equipment operators will not be taken into account by the Freight Forwarding Manager when determining the order of fulfilling the orders.

16. Each non-standard order (e.g. the need to use two cranes working simultaneously, a crane with a capacity of more than 20 tons or a forklift with a capacity of more than 3 tons, etc.) requires, in addition to being specified in the order, confirmation of the acceptance of the order by the Exhibition Office no later than 5 August 2022 and determining the terms of payment.

17. The Exhibitor who wants to use a telescopic loader or crane other than provided by Organizer's site is obliged to

report it to the Organizer on form D in order to obtain an Entry Permit. It authorizes to enter the exhibition area and perform the service only at the Exhibitor's stand.

18. In the case of performing work at a stand other than the one specified in the Entry Permit, a penalty of 1000 PLN will be charged.

SAFETY RULES

19. Only people whose presence is necessary may stay in the place, where unloading and loading works are performed.

20. During unloading and loading, both the Exhibitor's representatives and the operators of means of transport are obliged to strictly observe the rules of safety and follow all instructions of the Forwarding Manager.

21. Unloading and loading takes place at the Exhibitor's risk.

During operation, the crane carries out preparatory activities for lifting the exhibit (amongst others, positioning of supports, positioning of the crane jib, placing the slings, etc.), exhibit lifting, lowering, positioning and re-positioning activities, and finishes with folding its supports, thus ending its work for the Exhibitor.

23. After all operations are ended, the Crane Operation Card is signed, in which the time used for handling operations is confirmed by the Exhibitor's representative, who has been present during unloading/loading operations.

24. The crane operator cannot place the slings on the exhibit on their own, all activities connected with placing the slings on the exhibit must be carried out by the Exhibitor's personnel, who knows correct locations for them, as well as the location of the centre of gravity. The crane operator may (but is not obliged to) assist in the above-mentioned activities or perform them himself only at the express request of the Exhibitor and at the Exhibitor's risk.

TELESCOPIC LOADER / FORKLIFT

25. The working time of a telescopic loader / forklift truck starts from the moment of arrival to the customer. During this time, preparation for the operation of unloading, loading or moving the exhibit takes place (including visual inspection of the exhibit in order to determine the places technologically suitable to insert the forks of the loader / forklift truck) and the actual handling operation.

26. After all operations are ended, the Forklift Truck Operation Card is signed, in which the time used for all handling operations is confirmed by the Exhibitor's representative, who has been present during unloading/loading operations.

RAMP

27. The ramp is used exclusively for unloading and loading operations. It is impossible to use the ramp for purposes other than the ones mentioned above (such as, for example, assembly works).

28. It is forbidden to unjustifiably occupy or block the ramp, as well as the area in its vicinity, in particular by parking vehicles and machines, waiting for the arrival of new cars with equipment for the Exhibitor, etc.

31. No claims will be accepted after signing the Operation Card.

32. Complaints and comments related to the order of forwarding work, the waiting time for the fulfilling of a previously placed order and the inability to reserve equipment and leave the equipment for more than one forwarding operation with one exhibitor will not be taken into account.

33. In the event of failure to use the ordered unloading / loading services, no refund shall be given.
